THE SODA STRAW BET

You need:
2 straws
A glass of water

Put one straw into a glass of water. Beside it, but outside the glass, put another straw. Challenge one of your friends to put the ends of the two straws in his or her mouth and drink some water.
It can’t be done!
But you can do it easily.

The Secret:
Put your tongue over the end of the outside straw.
Why does it work?
When the outside straw is open at both ends, you can only suck air through this straw. When the top of this straw is closed by your tongue, you can draw liquid through the other straw.
