Step-by-Step Photo Guide

On to Next Page
Fill the glass with water.
Cover with handkerchief, tighten and secure it with a rubber band.

Cover the glass with palm, invert and carefully remove bottom hand.
One by one, insert tooth-picks through the handkerchief thus making holes. Inspite of which, no water spills.
The handkerchief is loose-cups into the water glass. Secure it with a rubber band.

**Invert carefully**

Handkerchief assumes inverted parabolic shape
Now the TRICK! Hold the glass with one hand and press the top of the glass with the other. Lots of bubbles appear in the glass as if the water was BOILING!
