Detailed Worksheet

A Rubik's cube, this is a device similar to a Rubik's cube. But this device has different patterns of raised dots on its sides corresponding to corresponding to different letters can be formed on its sides. Thus different dot patterns on the sides, arranged in three columns of two rows on each side of the cube. Thus each letter of the alphabet, any Indian language (or for many Indian languages) can thus be represented. Thus each column of three squares with can be read aloud a common axis. Thus different dot positions the Braille representation of letters in any language. The raised dots appear in one or more of the six positions. A Braille Cube, can learn the Braille language with this wonderful cube.
