CITRUS TWISTS

An extremely simple and very effective way of displaying citrus fruits, such as limes, lemons and oranges. Slice the fruit thinly; place each slice flat and make a cut into the center of the slice as shown.

Hold the slice of fruit in the fingers of both hands placed on each side of cut; then twist in opposite directions. Two or three slices can be placed on top of one another and twisted to together give a double or triple effect.

This lemon and lime garnish is made by twisting a slice of lime as before. Take a slice of lemon and make a longer cut past the center. Twist the lemon and place over the lime twist. Use for almost any dish, particularly seafood.
