Straws

Make a glider:

You'll need-

- pattern
- paper
- straws
- tape
- scissors

- Cut the strips (1/2” wide)

- Form strips into circles
• Tape one circle to end of straw
• Tape other circle to opposite end
• It's ready to fly!

• Try different shapes.
• How high does each fly?
• How far do they glide?
• Try aiming for a target.

What changes if you use different kinds of paper? Use a cocktail straw to make tiny gliders. Which end is the front of the glider?
