1. Cut the first straw at a slant.

2. Cut four petals in the second straw.

3. Use the third straw as it is. Dip it in soap solution.

4. On blowing you will see only a small soap bubble.

5. With the slant-cut straw you will be able to blow a bigger bubble.

The petals hold a lot more soap solution and hence make the largest bubble!

6. However, with the four-petal straw you will be able to blow the biggest bubble!
