Citrus Sipper
You don't need a pitcher to make this lemonade — in fact, you don't even need to stir.
Simply break a peppermint stick in two and insert one half directly into an uncut lemon. Suck on the peppermint stick as you normally would, and after a few minutes (surprise!), you'll taste lemon juice!
Here's how it works: as you suck on the candy, tiny holes are created, turning the stick into a straw. The sour juice of the lemon combines with the sweet and minty taste of the peppermint stick for an instant treat.
