Homemade Butter

MATERIALS
Plastic jar
Whipping Cream
Marbles

WHAT TO DO
Fill a clean plastic jar halfway with whipping cream.
Drop in two or three clean marbles and screw the lid on tightly.
Shake the jar for 10 to 15 minutes.
First the liquid will turn to whipped cream, then it will separate into a thin fluid and a yellow blob of butter.
Wrap the butter in a clean dish towel, squeeze out the remaining liquid, and enjoy.
