RETRIEVE THE PAPER Clip

You need:
A paper clip
A large glass or plastic bottle
Water
Magnet

THE SET UP
Drop a paper clip into any empty large glass or plastic bottle, and then fill the bottle with water. How can you get the clip out of the bottle without emptying the water or getting your fingers wet?

The SECRET
Slide the magnet up along the outside of the bottle, carrying the clip up and out of the bottle’s mouth.

Why does it work?
Magnetic force is able to penetrate many solid objects, even glass!
